

The two-year (120 ECTS) Master on Integrative Synthetic Biology (MISB) – the **first graduate school on synthetic biology in Spain** – aims to provide graduate students (from life and physicochemical sciences to technology and engineering) with an **integrated program of training, research, and innovation on synthetic biology and related disciplines in a cutting-edge scientific environment.**

Why should you enroll in the MISB?

- Reduced groups (max. 20 students / year)
- Advanced practical training: Two semesters of integrated lab rotations before the Master Thesis project
- Extensive training in a wide array of transferable skills to work in academia, industry, and beyond
- MISB teachers are first-class group leaders from the CSIC and national/international research centers
- **PRE-REGISTRATION (first call): 03 March – 30 June 2023.** <https://wapps001.uimp.es/preins/index.php> & <http://www.uimp.es>
- **MORE INFORMATION:** preinscripcion.posgrado@uimp.es & postgrado.csic-uimp@csic.es (cc: misb-synbio@cib.csic.es)
